

# WESTFIELD SCHOOL POLICY AND PROCEDURE

## Curriculum Policy

DATE WRITTEN: September 2012

PRINCIPAL AUTHOR: N GILBERT

Latest Date revised: January 2020 – Ratified by the C&A Committee 24/02/2020

# **WESTFIELD SCHOOL**

## **CURRICULUM POLICY DOCUMENT**

### **Rationale**

In accordance with the requirements of the 2011 Education Act, all state-funded schools are required to offer a curriculum that;

“is balanced and broadly based, and promotes the spiritual, moral, cultural, mental and physical development of pupils at the school and of society. It should prepare pupils at the school for the opportunities, responsibilities and experiences of later life.

The school curriculum comprises all learning and other experiences that each school plans for its pupils.”

Westfield School caters for young people between the ages of 2 and 19 with a range of learning difficulties and disabilities; therefore, the National Curriculum, (NC) Early Years Foundation Stage, (EYFS), Multi-Sensory Impairment (MSI) Curriculum and Adult Core Curriculum (ACC), are taken as the core of our response to individual pupil and student need. However, these nationally published curriculum documents only form one part of the Westfield School curriculum.

### **Intent**

Westfield School aims to provide a curriculum which is:

- Sufficiently broad, so as to encompass the statutory elements for each age and stage, whilst ensuring opportunities for other areas of learning pertinent to the development of the individual;
  - Sufficiently balanced, so that the development of the social, emotional, cognitive and physical attributes of individuals are considered and equally valued;
  - Sufficiently challenging and stimulating, supported by appropriate levels of scaffolding and adult intervention leading to maximum possible independence and key skills;
  - Relevant, in order that the experiences and opportunities offered are appropriate to the needs of individual pupils and students;
  - Differentiated, to ensure that what is taught is matched to needs and abilities and reflects the pupils' identified outcomes from Education, Health and Care Plans.
  - Progressive, so that pathways to accreditation are identified dependent upon individual aptitude and interest.
  - Inherent with the development and instilling of core values and promotion of spiritual, moral, cultural, mental and physical development;
- and**
- prepares pupils for the opportunities, responsibilities and experiences of adult life, recognising and accrediting on-going effort and progress

The success of the curriculum is dependent upon the following principles:

- Continuity and progression;
- Quality First teaching, with approaches linked to learning styles;

- Partnership between pupils, parents and carers, governors, partner schools, and the community in Leominster and beyond;
- Effective and flexible use of resources and equipment;
- Multidisciplinary cooperation involving colleagues from the local Health Trust, Social Care and the voluntary sector;
- The close collaboration of all staff, teaching and non-teaching, to identify priorities, monitor differentiation, progression and continuity through planning, collating records, making assessments and providing reports with regard to individual pupils;
- Regular opportunities for monitoring and evaluating the whole curriculum balance.

### **Responding to pupils' needs and overcoming potential barriers for individuals and groups of pupils**

Throughout the school day we will provide conditions most likely to facilitate learning for all our pupils through:

- Provision of appropriate information technology hardware software and peripherals;
- Provision of a robust topic-based curriculum.
- Appropriate use of positioning and mobility aids;
- A total communication environment featuring signs, symbols, tactile, auditory, olfactory and object of reference cues;
- Pupil specific therapeutic regimes – including speech and language therapy, physiotherapy or medication;
- Implementation of strategies to alleviate sensory impairments and enable access to the adapted curriculum;
- Individual behaviour support plans designed to support challenging or negative behaviours;
- A commitment to interdisciplinary collaboration and partnership with pupils, parents, other professionals, governors and the community.

### **Statutory Curriculum Frameworks referenced**

The Westfield School curriculum has been designed by combining and extending the principles of the Early Years Foundation Stage with National Curriculum Key Stages 1, 2 and 3, leading into KS4 and beyond with the introduction of Foundation Learning Pathways using accredited materials and qualification routes.

Students with complex needs and PMLD access additional activities and learning content from the curriculum for Multi-Sensory Impaired Children (MSI) developed by the Victoria School in Birmingham in collaboration with SENSE.

### **Curriculum Structure**

The seven areas of learning identified in the Early Years' Foundation Stage, (EYFS) are linked to those of The National Curriculum and the Adult Curriculum as follows:

<b>EYFS</b>	<b>Curriculum subject areas</b>	<b>Foundation Learning Areas and qualifications</b>
Mathematics	Mathematics	Functional Skills Numeracy <b>OCR</b>
Literacy; Communication and language	English	Functional Skills Literacy <b>OCR</b>
Understanding the world	Science, Geography,	Functional Skills ICT <b>OCR</b>

	History, Design and Technology Computing	Vocational skills <b>WJEC</b>
Personal, social and emotional development (incorporating citizenship)	PSHE, Citizenship, economic well-being	Units of Personal Progress Towards Independence <b>ASDAN</b>
Expressive Art and Design	Art and Design, Music	Vocational skills <b>WJEC</b>
Physical development	Physical Education; Health & well-being, Relationships and Sex education	PE and sports activities at local providers

Religious Education is offered as defined by the agreed local syllabus and incorporated into existing curriculum themes as best suited to content, taking into consideration statutory hourly coverage requirements.

The common and general requirements of the National Curriculum allow for appropriate access, relevant to the pupils, through a variety of means: -

- By modifying and extending the programmes of Study;
- By using aids and adapted materials;
- By recognising the value of experience as well as attainment;
- By using the contexts for learning provided in the programmes of Study rather than only the content;
- By considering the allocation of time spent on specific subjects and activities;
- By selecting material for pupils outside their Key Stages;
- By considering the programmes of Study from the Key Stages and carefully selecting work to create meaningful learning opportunities delivered at an appropriate level;
- By covering some of the Programmes of Study in depth, some in outline, and discarding those aspects which are deemed to be inappropriate to the needs of individual pupils.

#### **14-19 Curriculum and Foundation Learning**

It is at this stage of their education that students commence accessing accreditation and/ or qualifications. Opportunities for students to follow Foundation Learning Pathways are introduced for all students.

#### Key Stage 4

The statutory subjects for all students are English, Mathematics, Science, Computing, Citizenship, Physical Education and Science. The teaching of careers education, sex and relationships education, work-related learning and religious education is also statutory. Schools must also offer the arts, humanities, MFL and DT. All these subjects are delivered via a themed approach, enabling the linking of concepts and ideas to individual experience. The curriculum also references non-statutory programmes of study for:

- Religious education, based on the Herefordshire Framework for Religious Education
- Personal wellbeing, which includes the requirements for sex and relationship and drugs education
- Economic wellbeing and financial capability, which includes the requirements for careers education and work-related learning.

ASDAN Transition Challenge is used to recognise individual students' achievements towards developing independence and autonomy, and certain students also undertake controlled assessments in functional English and maths if appropriate.

### F.E. Students- sixth form

Further accreditation of Personal Development and Functional Skills occurs once students enter the Further Education phase, in the form of OCR Functional Skills Entry levels 1-3, ASDAN Units of Personal Progress (Entry Level 1), or Towards Independence modules. Qualifications achieved within Units of Personal Progress depend upon the total number of points accrued by an individual student, leading to an Award, a Certificate, or Diploma. Additional qualification routes follow Welsh Joint Education Committee (WJEC) subjects linked to personal aptitude and skill level.

There is no requirement for students to follow the National Curriculum at this stage of their education, so core entitlement is taken from a mixture of the Adult Core Functional Curriculum, National Curriculum PSHE, RSE and 11-19 Economic Well-being, and key skills development.

Emphasis is placed upon developing key skills in partnership with vocational learning. Elements of our Further Education provision are enhanced by off-site opportunities, either by partner providers or by accessing community facilities. Work-based learning forms a part of each student's week.

Besides the core entitlement, other school-based delivery includes Food Technology and independent living skills relevant to developing autonomy as an adult. Wherever possible all evidence of learning contributes towards the relevant accredited scheme. However, the curriculum is never compromised in preference of accreditation, as individual development is our primary concern.

### **Multi-Sensory specific learning across all school phases**

To address the specific needs of learners with PMLD, and/or sensory impairment, the inclusion of aspects of the SENSE MSI curriculum ensure that all identified needs can be met through interweaving targets and experiences specific to these characteristics.

The Multi-Sensory Curriculum is divided into eight domains, each addressing a specific aspect of learning. The domains are:

- social relationships and emotional development;
- communication;
- conceptual development;
- sensory responses;
- understanding of time and place;
- orientation, movement and mobility;
- ownership of learning;
- responses to routines and changes.

The inclusion of this approach allows for considerable flexibility in curriculum delivery, enabling learners to focus on individual targets based on these domains whilst accessing much of the same content as their peers. This ensures that the curriculum is appropriate for pupils with any combination of hearing, visual and other sensory impairments, supported and enriched through consultation with colleagues from the local health trust.

### **Achievement and Attainment across the curriculum**

Pupil progress towards curriculum targets is measured and reported using 'B Squared Steps' which combines the Early Learning Profile (for students in Nursery and Reception), with all attainment based on previously well established and commonly understood P-levels, (pre-key stage levels) Milestones, NC levels, and Entry Levels.

It is acknowledged that, for some, progress may be dependent upon physical and health needs, and will at times appear slow or indeed regress. Because of this, the MSI curriculum also offers models of assessment and attainment tracking, which are used to demonstrate lateral progress reflecting developing levels of independence within certain targets.

The precise balance between aspects of the curriculum will vary in response to pupils' individual needs, and will be determined through the Person-Centred Review process, and statutory reviews of the EHCP. Curriculum planning devised by staff address the common and individual needs of students at different stages of their development.

This policy was recommended for approval by the Curriculum and Achievement Committee on 24.02.2020 and subsequently approved by the Full Governing Body. To be reviewed annually.
