Scenario 1: colleague or student with possible symptoms of covid19

If you have, or are showing symptoms of, coronavirus (COVID-19) (a new continuous cough, a high temperature, or a loss of, or change in, your normal sense of taste or smell – anosmia) you should be at home, in line with the guidance for households with possible coronavirus infection.

After 10 days:

No temperature; but cough and/or anosmia- return to usual routine Temperature: remain in self-isolation and seek further medical advice.

Scenario 2: Living with someone with a possible/ positive covid19 result

If someone you live with is showing symptoms of, coronavirus (COVID-19) (a new continuous cough, a high temperature, or a loss of, or change in, your normal sense of taste or smell – anosmia), they should follow government advice and book a test via the online service or by calling 119.

Telephone Julie/ Nicki immediately (colleagues), or call school (parent).

All symptomatic people need to take a test.

Remain home and self-isolate until result is known

Negative test result
Resume normal activity,
Return to school

Positive test result of any relative Everyone remain home for 14 days from first symptom or positive result, whichever is latest

Colleague/ student becomes symptomatic Refer to flow diagram for scenario 1

No symptoms develop after 14 days
Resume normal activity
